

Master System
ERP Business Software Solutions

October 2011 Newsletter

Arcadia, CA –October, 2011 - Master System, a leading developer of ERP business software solutions, is excited to inform you about these new features:

Template Items

OMS now supports templates, which lets you efficiently create sales orders and invoices easily and quickly. You can customize to specify what fields you want in a template, such as item numbers, quantities, and price, letting you create recurring sales orders and invoices with just one template. Ask us how this feature can be added to your system.

Sales Order Item Ranking Inquiry

With so many items in your inventory, it is important to know what items are popular sales order items and other statistics. At OMS, we believe this data is important to your business, so we've made it easier to read this data, print it out, or even export it to a Microsoft Excel file.

iOMS

OMS is on the App Store for your iPhone, iPad, or iPod touch. You can download this simple app for your sales orders, invoices, and inventory counts for free today on iTunes. You may customize the interface between iOMS and your OMS.

OMS for Android

We are currently looking into Android development.
