

Master System
ERP Business Software Solutions

eMaster 

March 2011 Newsletter

Arcadia, CA – March, 2011 - Master System, a leading developer of ERP business software solutions, is pleased to inform you some features to get your attention:

OMS Shipping Interface

With the implementation of this Interface, there is no need to do double data entry between OMS and UPS WorldShip or FedEx. This interface enables the use of your company's existing customer data to generate shipping labels and capture billing information. The billing information and tracking number is automatically saved in OMS for your records which makes the process more convenient and efficient. Ask us about it, we'd be pleased to let you know how you can use OMS interface with UPS WorldShip or FedEx.

eMaster Enterprise Web 2.0 - *Don't Just Build a Web Site, Build Your Business*

eMaster is our exciting eCommerce solution, which is built from ground up using the latest Microsoft .NET framework. What this means to the users is a secured and highly functional website that features all of the modern components found in other popular eCommerce websites.

Even the small businesses can benefit from using eMaster and will definitely find a *reduction in overhead costs and the increase in global sales* that will expand your client base and your profit margins. Selling your products and services online will allow you to step up your business and process requests in a far shorter timeframe than the traditional communication by phone, fax, or mail.

This opens the door for business growth. Whether your business is large or small, setting up for business online and maximizing e-Commerce functions of your business by upgrading to eMaster Enterprise Web 2.0 is an advantage of opportunities that have never been more accessible. Most importantly, business on an eCommerce level can be run from just one location and reach the entire globe.
